Subject: Microsoft anti trust suit

This ridiculous suit should be dropped immediately. Thanks to stupid government bureaucrats, the economy took a major hit when this bogus suit was brought. It impacted the stock market, significantly, and started the tremendous decline that we are just now turning around.

This is government at it's worst, unproductive trouble makers doing nothing but getting in the way of productive job providing Americans. As might be expected it was formulated and pushed along by a leftist administration headed by people who really don't like capitalism very much.

It should be sent back to where it belongs, limbo.
